

## MetPrep Diamond Products Range

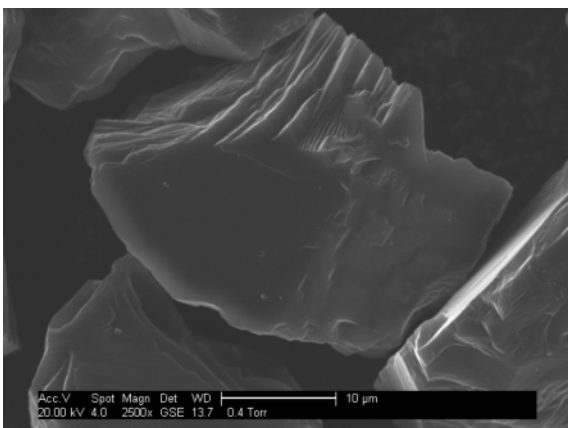

The MetPrep diamond products covers the whole range needed for successful materials preparation. Options include **Monocrystalline** diamond for routine preparation or **Polycrystalline** diamond where a greater stock removal rate and better surface finish is required.

Both of these diamond options are available in 250 ml manually pressurised sprays, 400 ml trigger Sprays, 1 litre refill bottles and in syringes of diamond paste.

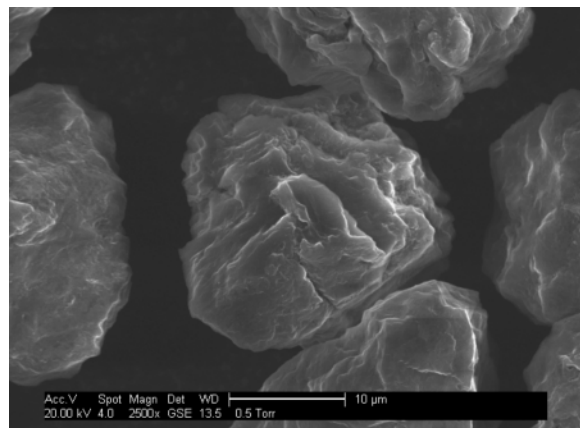

For those with materials that are susceptible to attack by water an **Oil based Monocrystalline** option is also available

The **Polymet** special formula product option has been designed to increase preparation efficiency and create a superior surface finish. The **Diamet** option is a unique self lubricating formula trigger spray option gives excellent performance with maximum economy.

As well as the Diamond suspension range there are **Monocrystalline & Polycrystalline Paste** options accompanied with Alcohol based, Water based & Oil based lubricants.

Monocrystalline diamond 30 micron

Polycrystalline diamond 30 micron
