

INVERTED MATERIALS MICROSCOPES

IMMR-1B Bright field & IMMR-1BD bright & dark field

IMMR-1B & IMMR-1BD inverted materials microscopes with:-

- Camera port
- Wide-field 10x/22 eyepieces – one focusing with cross-line & scale graticule
- Intermediate tube with rotating analyser
- Quintuple nosepiece
- Built-in 6v 30W illumination (1B) and 12v 50W illumination (1BD)
- Planachromat 5x/0.10 (BD for 1BD)
- Planachromat 10x/0.25 (BD for 1BD)
- Planachromat 20x/0.40 (BD for 1BD)
- Planachromat 50x/0.65 (BD for 1BD)
- Also available:- 40x, 60x, 80x & 100x
- Mechanical XY stage with vernier scale
- Choice of C-mounts available

IMMR-1B & 1BD are robust inverted materials microscopes for reflected transmitted light bright and dark field with photo-port

Supplied with a range of Planachromat objectives, (FN22) eyepieces & XY stage

Both are ideal microscopes for teaching & laboratory applications.
